

*"I have been searching for a replacement product for the skin and the ears for quite some time. At last, with Otysan, I successfully found what I was looking for."*

**Susanne Schmid,  
veterinarian**

# Otysan

Supports the regeneration of the skin, especially for use on an in the ear. Can also be used in skin folds. Made with Manuka honey.

**Only available at your  
veterinary practice**

## Otysan

**Supports the regeneration of the skin, especially for use on and in the ear. Can also be used in skin folds. Made with Manuka honey.**

Otysan drops are used to comfort and soothe irritation of the pinna and outer ear. They support the regeneration of skin, especially on and in the ear. The unique combination of botanical ingredients and high-grade Manuka honey (MGO 514+/UMF 15+) in Otysan supports natural skin functions and calms irritated areas of the auditory canal.

### Product type

Care product for animals.

### Contents

20g drops (approx. 170 pumps)

### Composition

Manuka honey (MGO 514+/UMF 15+), calendula officinalis, acidum lacticum

### Excipient

Glycerine

### Daily recommended use

2 x daily

	1–2 pumps
< 10kg	2 pumps
10–20kg	3–4 pumps
> 20kg	5–6 pumps

### Instructions

#### Instructions for application to skin folds

When applying Otysan to skin folds and lips, lightly massage the drops onto the affected area.

#### Instructions for application to ears

When applying Otysan to ears, clean the ears before applying the recommended number of drops onto the affected area of the ear. Press the dispenser several times. Gently massage in and distribute the drops evenly in the ear.

### Note

Do not store over 25°C. Use within 6 months after opening.

Keep out of reach of children.

Made in Germany.

## Ingredients (excerpt)

### Manuka honey (MGO 514+)

Manuka honey is derived by honey bees from the South Sea myrtle (Manuka bush) in New Zealand and has been used there for many generations. Otysan features Manuka honey with a particularly high level of methylglyoxal (MGO 514+), a sugar metabolite that is present in concentrations 100 times higher than in conventional honeys. Due to this unique natural phenomenon and the subsequent antibacterial properties, Manuka honey is highly acclaimed by experts worldwide.

### Calendula extract (*Calendula officinalis flores*)

Calendula nurtures and soothes irritated skin and the infected area.

### Lactic acid (*Acidum lacticum*, pH-value: 2,8)

Lactic acid lowers the pH value (pH = 2,8) to an inhospitable environment for malassezia and bacteria.
