veterinary practice

*"VomiSan is dynamite.
Smacking and tummy aches
have vanished."*

Sonja Münch, pet owner

*"I like to permanently
administer VomiSan for the
gastric mucosa. So far,
it has always worked."*

Susanne Schmid,
veterinary assistant

*"In my opinion, VomiSan
should be in every pet's
medicine cabinet."*

Lisa Pinsenschaum, veterinarian

VomiSan

To support the gastic mucosa, the throat and the stomach.

The special combination of ingredients soothes the mucous membrane of the stomach and provides protection against substances that can attack and irritate the sensitive stomach wall. VomiSan can be given during and after therapy with painkillers or antibiotics. It is also ideal for "grass eaters", "chompers", "snow eaters" and "saltwater drinkers". In powder form, VomiSan can easily be mixed with food, making it ideal for cats and dogs that refuse to take tablets. VomiSan powder contains no added flavorings, is suitable for animals suffering from allergies and can be administered over a long period of time.

Ingredients (excerpt)

Dill tincture (*Anethum graveolens fructus*)

The most important property of the dill fruit is its calming effect on the smooth musculature of the gastrointestinal tract.

Psyllium (*Plantago ovata*)

Indian psyllium husk has a strong natural swelling effect: The seed can absorb up to 40 times its own weight in water. Once in contact with water, it forms a protective layer of mucus. This coats the lining of the stomach and esophagus like a film. In the intestine, psyllium husks bind excessive fluid. The feces is thus bound and stays in the intestine for a longer period of time. This ensures that the feces is consolidated and the output of the feces is naturally regulated.

Chamomile extract (*Matricaria chamomilla flores*)

Chamomile soothes and relaxes the muscles in the gastrointestinal tract.

Marshmallow tincture (*Althaea officinalis radix*)

The authentic marshmallow root helps to maintain the natural protective film of the mucous membrane of both the throat and the stomach.
